Guardian I Guardian I- Model1384 B- Mechanical Fire Suppression System with Fusible links w/Electric Shut-off. This is the newest "B model" that replaces the Guardian-1384A fire systems. It now comes with a brass valve and uses a wet potassium carbonate solution, effective January, 2012.

Guardian III The Guardian III (G300-B) is a unique, state-of-the-art residential, range-top automatic fire suppression system for your home. It is also approved by Underwriter's Laboratories (UL & ULC) for the protection of residential cooking equipment in light commercial occupancies*, such as group homes, dormitories, day care centers, church kitchens, fire stations, break rooms, libraries, and civic group meeting halls. This self-contained system can be installed by a handy homeowner or contractor in under an hour.
